

DOZ-7600 cabinet mounted water ozone analyzer (constant voltage method)

This product is the affordable line of industrial water ozone measurement and control instruments, digital temperature compensation, 4 ~ 20mA current output, suitable for chemical, oil refining, paper, sugar, metallurgy, power generation, pharmaceutical and other industrial sectors and general industrial on-line monitoring and control of water.

Model	DOZ-7600
Measuring range	0.01~20.00mg/L
Resolution	0.01
Accuracy	±1.0%F.S.
Temperature	0~60 °C
Pressure	atmospheric pressure
Power supply	220VAC ±10%
Output signal	4~20mA two wire isolation signal output
Installation	1/8" NPT thread or flow cell
